THE SCHOOL READY CHILD!

It's all about relationships...
with themselves, their family,
and their community.

How do children become school ready? That is a big question! It involves more than just turning 5-years-old. It begins before birth with good neonatal care and continues after birth with supportive relationships with families and caregivers. Young children acquire social and emotional skills, foundational knowledge, and dispositions necessary for success in school and beyond through caring connections, early experiences and a ton of play!

Children are not innately “ready” or “not ready” for school. Their skills and development are strongly influenced by their families, through their interactions with other people, and their environments.

Being a school ready child means having the skills, knowledge, and attitudes necessary for success in kindergarten, later learning, and life. This includes all domains of development – physical, social and emotional, language, literacy, and cognitive.

Just as it takes all the ingredients to have a cake turn out tasty, it takes all essential ingredients to be school ready. Supportive families, communities, and schools.

What does a school ready child look like?

- ★ Problem solver
- ★ Social skills
- ★ Follows directions
- ★ Listening skills
- ★ Communication skills
- ★ Can write their name
- ★ Confidence
- ★ Trusts
- ★ Builds Relationships
- ★ Self-control
- ★ Cooperates
- ★ Persistence
